Subject index of volume 111

- Airways
 - bronchoconstriction, mechanics of breathing, 79
 - smooth muscle, contraction, 101
- Alphastat
 - central chemoreceptors, 65
- Altitude
 - flight muscle morphology, 189
- Amphibians
 - frog, 325
 - Xenopus laevis*, 311
- Anesthetics
 - volatile, 113
- Apnea
 - non-obstructive, cardiovascular response, 257
- Asphyxia
 - ambient temperature, 233
- Birds
 - finch (2 species), 189
- Blood
 - red cell flux, muscle capillaries, 163
- Brainstem
 - diencephalon, midbrain, pons, medulla oblongata, 55
- Capillary
 - muscle, geometry, 163
- Carbon dioxide
 - see Hypercapnia, 1
- Carotid body
 - hypoxia, ventilatory acclimatization, 33
 - sustained hypoxia, dopamine, 25
- Cell culture
 - PC12, 127
- Chemoreceptors
 - central, airway resistance, 1
 - central, CO₂, 65
 - peripheral, pulmonary circulation, 283
- Chemosensitivity
 - central, organotypic culture, 137
 - central, PC12 cells, 127
- Cold
 - ventilatory response, 247
- Control of breathing
 - asphyxia, ambient temperature, 233
 - central chemoreceptors, snail, 65
 - central chemosensitivity, 127
 - cold, hypoxia, hypothalamic integration, 247
 - hypobaria, hypoxia, 45
 - hypoxia, development, 55
 - non-obstructive apnea, cardiovascular response, 257
 - raphé nuclei, 15
 - sustained hypoxia, carotid body, 25
 - ventilatory acclimatization hypoxia, 33
- Development
 - airway resistance, 1
 - cardiorespiratory function, altering environmental O₂, 311
 - control of breathing, 55
 - hypercapnia, raphé nuclei, 15
 - lung maturation, 177
- Diffusing capacity
 - pulmonary, CO, exercise, 271
- Disease
 - diabetes, muscle blood flow, 163
- Edema
 - high altitude pulmonary, inflammatory cytokines, 301
- Epithelium
 - bronchial, smooth muscle contraction, 101
- Exercise
 - pulmonary diffusing capacity, 271
- Flight
 - muscle, capillarization, 189
- Gas exchange
 - pulmonary diffusing capacity, exercise, 271
 - VA/ heterogeneity, hypocapnia, 89
- Genes
 - c-fos expression, 127
- Hibernation
 - hypoxia, hypometabolism (frog), 325
- Hypercapnia
 - airway resistance, 1
 - central chemoreceptors, alphastat, 65
 - diaphragm activity, 153
 - phrenic, hypoglossal responses, raphé nuclei, 15
 - sleep apnea, 257
 - ventilatory response (spiny rat, 2 species), 223
- Hypertension
 - pulmonary, high altitude pulmonary edema, 301
- Hypobaria
 - short-term hypoxia, ventilatory adjustments, 45
- Hypothalamus
 - integration ventilatory metabolic responses, 247

Hypoxia

- ambient temperature, 233
- biphasic response, diaphragm, 153
- cardiorespiratory function (*Xenopus laevis*), 311
- central respiratory depression, 55
- chronic, lung vascular remodeling, 201
- high altitude pulmonary edema, 301
- hypometabolism (frog), 325
- pulmonary circulation, 283
- short-term, hypobaria, ventilatory adjustments, 45
- sleep apnea, 257
- sustained, ventilatory acclimatization, carotid body, 25
- ventilatory acclimatization, 33
- ventilatory response, 247

Inert gases

- N₂, He, washout, 89

Invertebrates

- pulmonate snail, *Helix aspersa*, 65

Kinases

- MAP, 127
- Protein, c-fos, 127

Mammals

- cat, 45
- dog, 79, 89, 113, 213
- goat, 25, 33
- humans, 101, 271, 295, 301
- lamb, 1
- minipig, 213
- pig, 89, 257
- piglets, 15
- rat, 137, 153, 163, 201, 233, 247, 283
- rat, neonatal, 55
- spiny rat (*Proechimys yonenagae*, *P. iheringi*), 223

Marsupials

- tammar wallaby, 177

Mechanics of breathing

- elastance, resistance, impedance, bronchoconstriction, 79

Mediators

- anti-inflammatory cytokines, 301
- dopamine, 25, 33
- endothelin, 201
- leukotriene D₄, 101
- NO, 213
- PDGF, 201
- pro-inflammatory cytokines, 301
- VEGF, 201

Medulla oblongata

- raphé nuclei, 15

Metabolism

- hypoxia, hibernation (frog), 325

- response to cold, hypoxia, 247

Mitogens

- PDGF, 201
- VEGF, 201

Morphometry

- marsupial lung, 177

Muscle

- diaphragm activity, hypoxic response, 153
- flight, capillarization, 189
- spinotrapezius, blood flow, diabetes, 163

Nerve

- phrenic, central chemoreceptors, 1
- superior laryngeal, 113

Neurons

- brainstem, central chemosensitivity, 137

Parasympathetic system

- central chemoreceptors, 1

Peptides

- vasoactive, endothelin, 201

Pharmacological agents

- diethyl pyrocarbonate, 65
- dipeptidase inhibitor, 101
- domperidone, 25

Pulmonary circulation

- chronic hypoxia, vascular remodeling, 201
- hypoxic vasoconstriction, 213
- peripheral chemoreceptors, 283

Receptors

- capsaicin-sensitive, irritant, 113

Resistance

- airway, central chemoreceptors, 1
- pulmonary circulation, 213
- pulmonary vascular, 283

Sleep

- apnea, hypoxia, hypercapnia, 257

Smooth muscle

- contraction, epithelium, 101

Sound

- trachea, spectral analysis, 295

Thermoregulation

- control of breathing, asphyxia, 233

Trachea

- sound production, 295

Upper airways

- irritation, volatile anesthetics, 113

Vagus nerve

- mechanics of breathing, 79

Ventilation

- collateral, 89
- spiny rat (2 species), 223
